

ADHITHI C IYER

Bengaluru, India · +91 95917 74950 · adhithiciyer2005@gmail.com · [LinkedIn](#) · [GitHub](#) · [LeetCode](#)

NSS HR Coordinator, RVCE · GDG RVCE

Computer Science undergraduate focused on AI/ML, backend engineering, and scalable systems, with published research and experience building intelligent, data-driven, full-stack applications.

EDUCATION

RV College of Engineering

B.E., Computer Science **CGPA: 9.11/10**

2023 – 2027 (Expected)

Bengaluru, India

- **Coursework:** Data Structures & Algorithms, OS, Computer Networks, DBMS, AI/ML, IoT.

EXPERIENCE

Itriangle Infotech Pvt. Ltd.

Embedded Intern

Jul – Sep 2025

Bengaluru, India

- Improved vehicle localisation accuracy by **17%** (RMSE 5.31 m → 4.39 m) via a Python pipeline fusing GPS + IMU data using Extended Kalman Filter and LSTM; modular architecture enabled independent unit testing. [\[GitHub\]](#)

INICAI, CSE Dept. Project, RVCE

AI Research and Development — *Translate.io*

Mar 2025 – Mar 2026

Bengaluru, India

- Reduced speech translation latency to **10–15 s on CPU-only hardware** via a 4-stage air-gapped pipeline (Whisper ASR → IndicTrans2 → noise suppression → Fast TTS) supporting 6 Indian languages, zero cloud dependency. [\[GitHub\]](#)

CSE Department Project, RVCE

Machine Learning and Development — *CueStream*

Sep 2025 – May 2026

Bengaluru, India

- Achieved **~78% 3-state engagement classification** in offline validation using decision-level fusion (gaze, posture, facial, speech) with CNN/SVM models (MediaPipe + OpenCV); real-time analytics via **FastAPI** REST backend with CI/CD-ready architecture. [\[GitHub\]](#)

RESEARCH & PUBLICATIONS

- **IEEE Access (Accepted):** “Green AI: A Comprehensive Framework for Energy-, Latency-, Memory-, and Carbon-Efficient Deep Learning Model Optimization.”
- **ICSE 2025, New Delhi (Best Paper Award):** “AI-Driven Prediction of Injury Risk in Athletes Using Training and Recovery Data: A Machine Learning Approach to Proactive Sports Management.”
- **ICSE 2025, New Delhi:** “Pose-Based Biomechanical Risk Identification for Injury in Handball Players Based on Computer Vision.”

PROJECTS

GreenAI — Sustainable Model Optimisation

Python | PyTorch | CodeCarbon | React

- Profiled **67 compression configs** (54 pruning + 13 quantisation) across VGG/ResNet/BERT/MobileNet; achieved up to **38% size reduction with <3% accuracy loss**, tracking CO₂e per run via CodeCarbon. [\[GitHub\]](#)

Linux IPC & SMT-Aware Job Scheduler

C | pthreads | System V IPC | Linux

- Built a **concurrent, priority-based job scheduler** using System V message queues + shared memory across 4 worker processes (4-pthread pool each), with SMT-aware CPU affinity via `pthread_setaffinity_np()` and cross-process thread safety via `PTHREAD_PROCESS_SHARED` mutexes. [\[GitHub\]](#)

Clinical Handover Intelligence Agent

Python | LangGraph | FastAPI | React 18 | Llama 3.2

- Engineered a **multi-agent AI system** (Planner, Risk Analysis, Synthesis agents) with real-time LLM streaming to a **React 18** dashboard via WebSockets; backend orchestration via **FastMCP** with strict **Pydantic** schema validation. [\[GitHub\]](#)

ACHIEVEMENTS & HACKATHONS

– Best Paper Award (Student Category), ICSE 2025

Awarded for the paper “AI-Driven Prediction of Injury Risk in Athletes Using Training and Recovery Data: A Machine Learning Approach to Proactive Sports Management.” Received a cash prize of **10,000**.

– Best Experiential Learning (EL) Project - 4th Semester

Awarded for **Translate.io**, recognized as the Best Experiential Learning Project by a jury comprising industry experts from IBM, Arm, NXP Semiconductors, and Microlab Instruments.

– Hackfinity 2025, PES University — Finalist

Developed an AI-powered return-to-tech platform using React, Node.js, and Firebase. [\[GitHub\]](#)

– GirlScript Summer of Code 2025

Contributed code, bug fixes, and documentation improvements to open-source repositories as part of GSSoC 2025.

TECHNICAL SKILLS

Languages: Python, Java, C

Frontend: React, HTML/CSS, Tailwind CSS

Backend: Node.js, FastAPI, Flask, REST APIs, WebSockets

Databases: MySQL, PostgreSQL, Firebase, MongoDB

Cloud & DevOps: Git, Docker (basic), CI/CD, GitHub Actions, Postman

AI/ML: PyTorch, TensorFlow, scikit-learn, OpenCV, MediaPipe, LangGraph, CNN, SVM, LSTM, EKF

Systems: pthreads, System V IPC, Distributed Systems, Linux

Certifications: NPTEL Data Science for Engineers — IIT Madras (Elite); NPTEL AI for Economics — IIT Kharagpur (Elite)
